

SPECIALIST FOR SERVICES IN WIND - ON AND OFF-SHORE

ROBUR WIND is part of ROBUR and combines all competencies and services related to onshore and offshore wind turbines. With almost 1.000 colleagues in Europe, North and South America, ROBUR WIND offers its customers the entire range of services for the long-term economic success of its plants – onshore and offshore. On land and at sea we offer service & maintenance (O&M), major component replacement and repair, rotor blade and tower services, electrical and mechanical assembly, electrical engineering, qualification and training as well as obstacle marking.

ROBUR WIND is characterized by a high degree of willingness to innovate, cross-manufacturer technical and proven expertise – not least thanks to its in-depth know-how in the field of prototyping. As an independent service partner of manufacturers, owners and operators, we also contribute to the fact that onshore and offshore wind turbines throughout Europe produce a reliable total output of over 170 GW

Service & Maintenance

- Classic semi- and annual maintenance for wind turbines
- Full maintenance and service contracts
- Gear box inspections

Blade service

- Rotor blade inspection – inside and outside – with service platforms, rope access technology or automatic, high-resolution camera
- Drone based inspections

Major component replacement

- Complete nacelles & hubs & blades & gearbox & pitchcylinder

Repowering & Recycling

- Dismantling of wind turbines
- Reconstruction of dismantled plants
- Recycling of components
- Dismantling of foundation
- Storage and transport

Innovative services

- Developing and producing obstacle markings especially for wind turbines
- Day and night marking, visibility control, tower marking, synchronization and on-demand lighting
- Developing and producing cost-effective retrofit solutions
- DGUV V3 tests, mobile system for VLF-cable testing
- Reconditioning of Pitch Control Battery Storage solutions

Support

- Project management, site Management, NCR management
- Implementation of standardised safety training and training on health and safety issues
- Provision of port and shipping logistic, monitoring of the entire supply chain, TCI concepts

As part of ROBUR, ROBUR WIND offers even more: more than 2,500 employees globally work in the wind, water, energy, industrial and process industries. As expert partners for our customers we create holistic solutions from planning and implementation, to maintenance and operation, to the relocation and decommissioning driving the challenges of digital transformation and ecological change.
